## EXPERIENCE

### 10X Academy Batumi—Mentor Front-End Development

November 2025 - Present

Mentoring over 300 students in modern Front-End development, providing guidance in React, JavaScript, TypeScript and industry-standard best practices.

### 10X Academy Batumi—Assistant of Lecturer

November 2024 - September 2025

Assisted the lead lecturer in delivering Front-End development courses, supporting students with React/JavaScript concepts and managing classroom learning activities.

### Armada Supply Chain- Intern Front-End Developer

March 2025 - October 2025

Contributed to developing and optimizing React-based front-end features for supply-chain management tools, improving UI efficiency and user experience.

## PROJECTS

### Aviator Crash Game

Developed a React-based clone of a high-value (~\$10M) casino Aviator crash game, featuring real-time multiplier animation and interactive cash-out mechanics.

### TaskFlow Pro

Built a Jira-like task management application with drag-and-drop workflows, enabling teams to organize, track, and manage tasks efficiently through a clean, React-based dashboard.

### Youth Football

Founded "Youth Football," a Next.js + Nest.js-based startup platform dedicated to improving Georgian youth football development through structured training tools, analytics, and club-player management features.

## SKILLS

HTML | CSS | Tailwind | Scss | JavaScript |  
TypeScript | [React](#) | [Next](#) | Canva | GSAP |  
[Node](#) | [Express](#) | Python | MongoDB | PostgreSQL |  
mongoose | Prisma | Jest | Unit  
Testing | OOP | GitHub | Docker | linux | JWT | AWS |  
Azure | Front-End | Back-end | Fullstack

## AWARDS

- **Front-End Mentor:** Led and mentored over 300 students in modern Front-End development (React, JavaScript, TypeScript), successfully preparing them for industry roles.
- **Entrepreneurship & Full Stack Project:** Founded "Youth Football," a Next.js + Nest.js-based startup utilizing structured training tools and analytics for youth football development.
- **Advanced Development:** Engineered a high-fidelity React clone of a \$10M Aviator crash game, showcasing real-time data handling and complex UX mechanics.
- **Productivity Solution:** Developed a Jira-like task management application (TaskFlow Pro) with drag-and-drop workflows to enhance team organization and efficiency.
- **Lecturer Recognition:** Recognized for strong technical knowledge and teaching capabilities, leading to selection as an Assistant Lecturer at 10X Academy.

## LANGUAGES

English : B2, Georgia:Native, Russia:B1

## EDUCATION

### Shota Rustaveli University — *Economics & Business*

October 2022 -- July 2025

Gaining comprehensive knowledge in business principles and economic decision-making, enabling me to build market-driven **software solutions that maximize user value and solve real-world problems.**

### Shota Rustaveli University— *Computer Science*

October 2025 - present

Building a deep theoretical understanding of core **computing principles and data structures**, directly applying this knowledge to optimize code performance and solve complex engineering challenges in **web development.**

### 10X Academy— *Full Stack Development*

November 2024- September 2025

Completed intensive, 10-month Full Stack Development training, acquiring proficiency in designing and implementing scalable, end-to-end web applications. Focused on technologies across the stack, including database management, server-side logic, and modern frontend frameworks.

### Re:Educate— *Front-end Development*

December 2023- March 2024

Gained foundational skills in Front-end Development, focusing on best practices for UI/UX implementation and transforming design mockups into functional and optimized web experiences.
